

Kai Staff Impression

Kai has very light blonde hair and blue-grey eyes. He is naturally fair but has a light tan in the summer. Kai has a small to medium build and is very tight and athletic; he has a naturally good physique and enjoys hiking and rock climbing to stay in shape. Kai has an oval face, smaller eyes, a nice nose and a beautiful smile. Overall, he is a very unique and handsome donor.

Kai is a uniquely talented and interesting person. His hobbies are varied and include writing, playing and writing music (he plays guitar and electric bass guitar), drawing, and woodworking. He was a professional carpenter for several years before going back to school to get a degree in Biology, which he now uses as a Biological Analyst/Parasitologist. Kai describes himself as very easy going and open-minded; we appreciate his wry sense of humor and passion for artistic self-expression. If you are looking for someone creative and caring, Kai would be a great choice for you!
