

Open Donor: Amir

Staff Impression

Amir has a lean build with long, defined muscles. The first thing we notice about Amir are his large green eyes that stand out against his dark brown hair and medium skin tone. He keeps his face clean shaven and his hair short. Aside from his beautiful green eyes, the most noticeable thing about Amir is his infectious smile. These features make Amir a very attractive donor.

Amir is possibly one of our nicest donors. He is always happy, with a broad smile and easy going demeanor. He is relaxed and optimistic and his presence always has a positive effect on those around him. We love how family oriented Amir is and what an impact his relationship with his family has had on him. When asked why he wants to be a donor, Amir answered, "To give everyone the opportunity of having a family." Amir is a donor that is sweet, patient and ever the optimist.
