

Kieran is a handsome donor with tan skin, dark features, thick hair, a round face, full lips, and a nose with a high bridge and pointed tip. He has broad shoulders and a muscular build that he has developed through lots of investment in one of his favorite pastimes, weightlifting.

Kieran is an impressive guy! This charmer is a bilingual surgeon who also plays the guitar and sings. He is a self-professed workaholic with the ambition and drive that it will take to further his career in both clinical and research medicine while continuing philanthropic work. Even though he keeps a busy schedule, he stays in close contact with his parents who, much like Kieron himself, are both highly intelligent and are an ever-present source of encouragement. We are excited to offer such a fantastic donor!
