

Orion Staff Impression

Orion is super tall with broader shoulders and an average to slender build. He has a full head of straight, long, light brown hair that is usually kept in a low ponytail. He has lovely blue eyes, a wide smile, a handsome square jaw line, and a short beard. His complexion is fair to medium with a few light freckles.

Orion is a true people-person. His genuine kindness and friendliness are the most noticeable features of his personality. He self-describes himself as the strong, silent type, but he doesn't come across as shy, and his friends call him as 'a big teddy bear'. He seems particularly introspective and well-spoken. His sense of curiosity and adventure has pushed him outside his comfort zone over the years to explore new places, and he is very open to new experiences. Orion is an avid hiker/backpacker and loves to take part in field research expeditions. He has a degree in Astrobiology/Biogeosciences, and currently works as an Astrobiologist. He prides himself on the research he has done under the NASA Space Grant. If you are looking for someone who is intuitive, hard-working, and open-minded, Orion would be a great choice for you!
