

Mosby 14527 Staff Impression

Mosby has a youthful, diamond-shaped face with high cheekbones, a distinguished jawline, a square chin, full lips, and full brows. His brown hair, brown eyes, and a moderate olive skin tone reflect the diverse ethnic origins inherited from his parents. Mosby's mother hails from Japanese and Korean roots, while his father's background comprises of British, Croatian, and Portuguese ancestry.

Currently in his second year studying global health, Mosby has aspirations of attending either dental school or physician assistant school after completing his undergraduate studies in art. An avid outdoors enthusiast, Mosby finds joy in surfing and skiing, showcasing his passion for the great outdoors. As a participant in the donor program, Mosby was motivated by the unique opportunity to make a positive impact, and he wishes the recipients the best of luck in their endeavors. Open-minded about potential future contact with offspring, Mosby extends his well wishes to the recipients, hoping for success and fulfillment in their lives.
